Coravin Wine List

We serve selected wines via Coravin here at Wood Street Bar, meaning that you can enjoy exceptional fine wines without having to buy a full bottle...

Coravin is a revolutionary device which allows us to pour wine from the bottle without actually opening it.

How does it work? A long, thin needle is inserted through the foil and cork, into the bottle. Argon – an inert gas – is then pumped through the needle, creating pressure which pushes wine back out through the needle. When removed, the cork re-seals itself meaning that the bottle can continue to be stored for a long time afterwards.

For wines that need to "breathe," using the Coravin System together with the Coravin Aerator instantaneously aerates your wine, which is equivalent to decanting it for 60-90 minutes.
